

MAGX2

THE NEW VERSION OF ARKON'S MODULAR DESIGN ELECTROMAGNETIC FLOWMETER

Based on the same modular design as MAGX1, keeping all its advantages with a few additional improvements to satisfy the feedback received from our distributors.

Features:

- Real time clock - Free of charge
 - Data-logging - Is now saved on a standard SD card, easier to find at a lower cost.
 - Display - To make the readings easier in low light situations, a blue, back - lit display is included
 - Channel frequency output - Binary and Frequency modules have been combined into one module. Open collector output is included in the PULSE module.
- It also includes the same input as the current binary module including a function for batching. The relay output has been improved to 4 channels including an INTERNAL relay, separately configurable to flow or errors.
- Calibrated Accuracy - $\pm 0.2\%$ accuracy of actual value

Arkon will accept orders from 1st April 2010*
